

Working Prototype Known Problems Report

Heading:

Document Name: Working Prototype Known Problems Report

Product Name: Dragon Circle

Team Name: Dragon Scrum

Date: 06/06/17

List of functions not working correctly:

- Sometimes the chat room will show a user entering twice, both in the messages and in the online users section
- Sometimes creating a room without a secret will cause an error
- Creating a duplicate room will cause an error
- Creating a duplicate account will cause an error

The errors just need to be thrown or redirected to a different page, or some error handling to test whether the information is duplicate.

List all problems with your software that your team has identified. Include in the item entry the input/action that causes failure; location of fault (if known); possible action for removal of fault. You will not lose points for items on the list; you will lose points for failing to put items on the list if your TA or the prof finds a problem during the acceptance test.
